

REMEDY® KNEE SYSTEM

KNEE INTERCHANGEABILITY

L

REMEDY® LARGE MODULAR KNEE

The REMEDY® Knee Spacer is part of the treatment foreseen in a two-stage procedure performed in the event of permanent prosthesis infection. The REMEDY® Knee Spacer implant is intended for temporary use only (180 days or less). It allows basic joint mobility and releases antibiotics into the joint area to protect the implant from bacterial colonization. A second surgery will be required at a later date to remove the REMEDY® Knee Spacer and replace it with a permanent knee joint implant.

REMEDY® Knee Spacers:

- Single-use medical devices/ethylene oxide sterile
- Formed with bone cement (PMMA) and gentamicin

TOTAL SYSTEM INTERCHANGEABILITY

- 65% of cases result in different size femur and tibia*
- 35% of cases use a tibial wedge*

M

REMEDY® MEDIUM MODULAR KNEE

S

REMEDY® SMALL MODULAR KNEE

Size XL Femoral Component also available upon request

* Internal OsteoRemedies data
